PREFACE

Curriculum planning is a continuous process. It is crucial in the context of education and plays an important role in bringing out desirable social, economic and cultural changes. By designing relevant and detailed syllabi for different stages of school education an important link is established between educational objectives and the expected developmental goals in a systematic and graded manner.

It is imperative to consider the various issues and concerns in education and relate them to social, economic and cultural issues along with numerous other issues related to environment, industry, agriculture conservation of natural resources, defence, health, nutrition and population and give fresh look to these issues while designing syllabus in an integrated manner. There is also an urgent need to address some other educational concerns like eliminating imbalances, facing the impact globalization, meeting the challenges of information and communication technology, linking education with life-skills and harnessing education for value development. Emphasis is laid on the process of learning and developing necessary academic and social skills more than acquisition of facts.
